YALI ZHANG

EDUCATION

Frontend Developer, Hyper Island, Sweden
August 2024 – March 2026
The program includes 10 phases combining project-based and module-focused learning. I've completed several team and solo projects, such as a movie search site with React and a doctor management system using Figma, React, Express.js, and MongoDB. These gave me hands-on experience with RESTful APIs and full-stack development. In the final module, I built a 3D interactive scene of my hometown using A-Frame and React, featuring basic interactions like a mini-game and clickable elements. With all modules now completed, the final internship phase is next.

System Developer Python/IT security, Lexicon Education, Sweden
September 2021 – February 2022
The course (yrkesutbildning) started with Web development in Python. As a part of this course, we created a blog site with Django and programmed in Python, HTML, and CSS. Many programming tools were used during the course, e.g. Visual Studio Code, GitHub, Postman etcetera. The course also covered IT security and Cloud.

Electronic Information Technology, Chengdu University of Technology, China
September 2001 – June 2005
Bachelor of Engineering

Business Administration, University of Science and Technology of China, China
March 2004 – July 2005
Bachelor of Administration

WORK EXPERIENCE

Sichuan Modern Vocational College, Chengdu
Director of electronics group
April 2010 – February 2018
- Taught courses in sensors, AutoCAD, circuit analysis, simulation, and other related subjects.
- Directed the electronics teaching program, managing faculty tasks, developing training curricula, and establishing an experimental lab.
- Led the creation of a three-year training program, revamped laboratory setups, and founded an internship center.

Sichuan Aerospace Vocational College, Chengdu
Lecturer
August 2005 – July 2009
- Delivered lectures on electronic instrumentation and measurement, sensor principles and applications, basic circuit analysis, and other related subjects.

SKILL SET

- Team player who can also work independently
- Excellent conceptual and analytical skills
- Proficient lecturer and speaker
- Good interpersonal communication skills
